Enable markdown-pdf.css

- markdown-pdf.includeDefaultStyles
- (VSCode, markdown-pdf)
- boolean. Default: true

"markdown-pdf.styles" is kept and editable in:

- C:\Users\tarmo\AppData\Roaming\Code\User\settings.json

```
"markdown-pdf.styles": [  
  "C:\\Users\\tarmo\\OneDrive\\Documents\\GitHub\\theo-armour-  
agenda\\markdown-pdf.css",  
  "C:\\Users\\tarmo\\OneDrive\\Documents\\GitHub\\markdown-pdf.css",  
],
```

Elsewhere, as in Workspace or Folder, it appears grayed out and it does not seem to be editable.

Last file in the array wins. Select the one you want by:

- Change the order in settings.json
- rename markdown-pdf.css to markdown-pdf-zzz.css

Header and Footer Templates

Header and Footer Templates can be stored and are available from a settings.json in any(?) .vscode folder

Templates require a div, span or ?? with at least a font-size:

```
<div style=\"font-size: 12pt; margin-left: 0.8in;\">text</div>
```

If margin-left for body text is 1in then header template needs margin-left: 0.8in; in order to line up

Tips

Format: letter

Margins: all 1in

Footer Template

%%ISO-DATE%%
